I completed an intensive Full Stack Web Development training at Masai School, where I mastered key technologies such as HTML, CSS, and JavaScript. The program also covered advanced frameworks like React.js, Node.js, Express.js, and MongoDB. This comprehensive training has equipped me to confidently contribute to diverse web development projects.

## Projects

### TronHealthCare

**Company: Towno ( Office location: Bengaluru )**

In the Tron healthcare project, I created a user-friendly platform for booking appointments at local hospitals and clinics. We ensure seamless login experiences for clinics, customer support executives, and customers, incorporate location-based searches, and offer coupons and plans for discounted appointments.

**Tech stack:** ReactJS, SQL, SAAS, MUI, Formik

### Top Gear Fashion

In a collaborative effort, we cloned and extended the TopGearFashion website, implementing essential features such as Signup, Login, Form validation, dedicated Men's and Women's pages, and a secure Payment page. Our technology stack included HTML, CSS, JavaScript, React, Redux, Chakra UI, and integration with MongoDB and Mongoose for efficient data management. The duration took to build this project 1 week.

**Tech stack:** ReactJS, Html, CSS, JavaScript, ChakraUi, Redux, Mongo-DB, Vercel
